

HD BROWS®  
HIGH DEFINITION BROWS

## AFTERCARE ADVICE

**TO KEEP YOUR HD BROWS LOOKING SALON PERFECT EVERY DAY, PROPER CARE AND MAINTENANCE IS REQUIRED.**

- Follow your stylist's recommendations and avoid tweezing in between appointments.
- Avoid excessive rubbing or touching of the treated area for 24 hours.
- Avoid prolonged contact with direct sunlight, the use of sunbeds, saunas, steam-rooms and swimming pools for 48 hours after the procedure.
- Avoid exfoliating and anti-ageing products around the brow area for 3 days either side of the treatment.
- Avoid using any fake tanning products on the face for 2 to 3 days either side of the treatment. If you do wish to use a fake tanning product on your face, apply a barrier to the hair and small area around the brow prior to tanning to prevent discolouration of your tint.
- Remember, your results will be darker and more defined immediately after your treatment. The make up applied is not permanent and tint will fade depending on the frequency of cleansing.
- We strongly recommend the use of the HD Brows Tint Lock Serum to prolong the wear of your tint and keep brows conditioned after your treatment.
- You must inform your HD Brows stylist immediately should you experience any swelling, itchy rashes, bruising, skin grazing or cuts after your treatment, so they can advise you on the correct procedure to follow.

**Questions or concerns? Be honest with your stylist - feedback is always valued.**
